Faster Internet Usage

Quick search

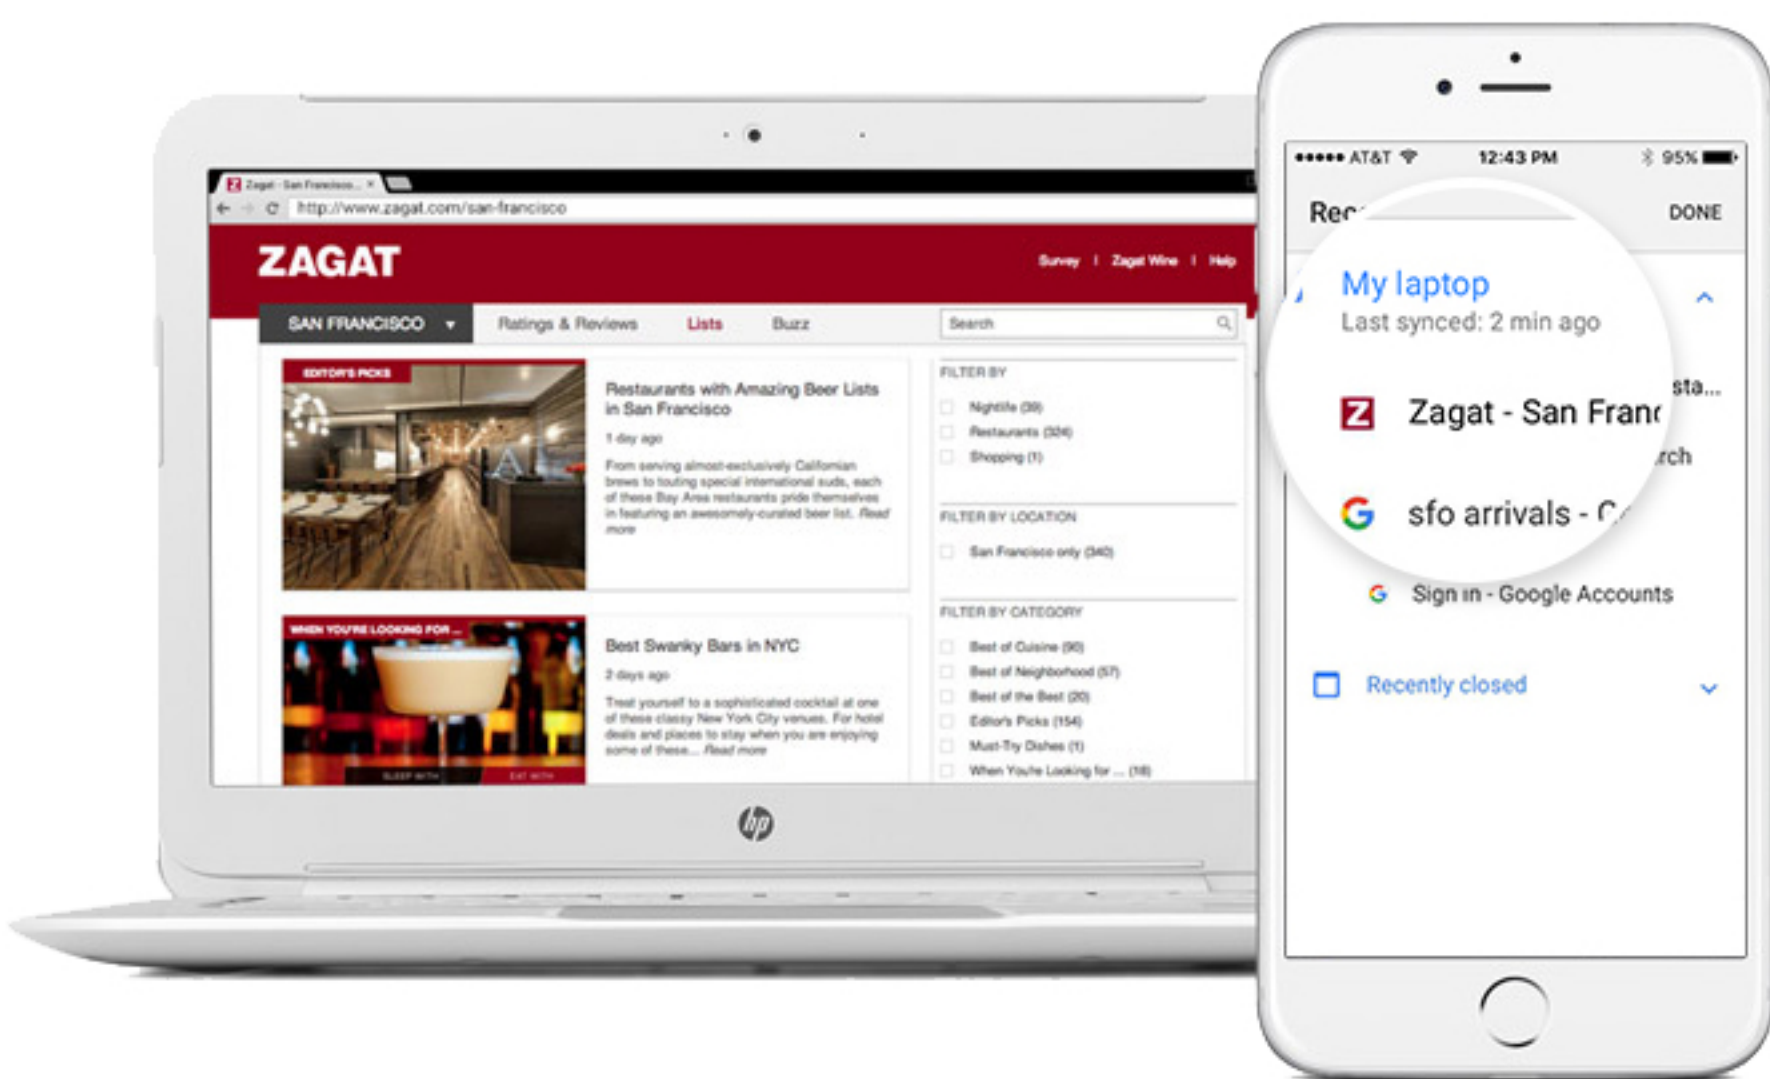

Search and browse in one window at the same time. As you type, you'll see search results and suggestions, including recently searched words and websites you visit, so you can easily choose. You can get the results you want in no time at all. Search in address bar

Autocomplete

You do not have to enter everything on a small screen. With AutoComplete, you can fill out forms with just one click. It also has automatic suggestions so you can save time because you only need to enter a few URLs and search terms. Using Autocomplete

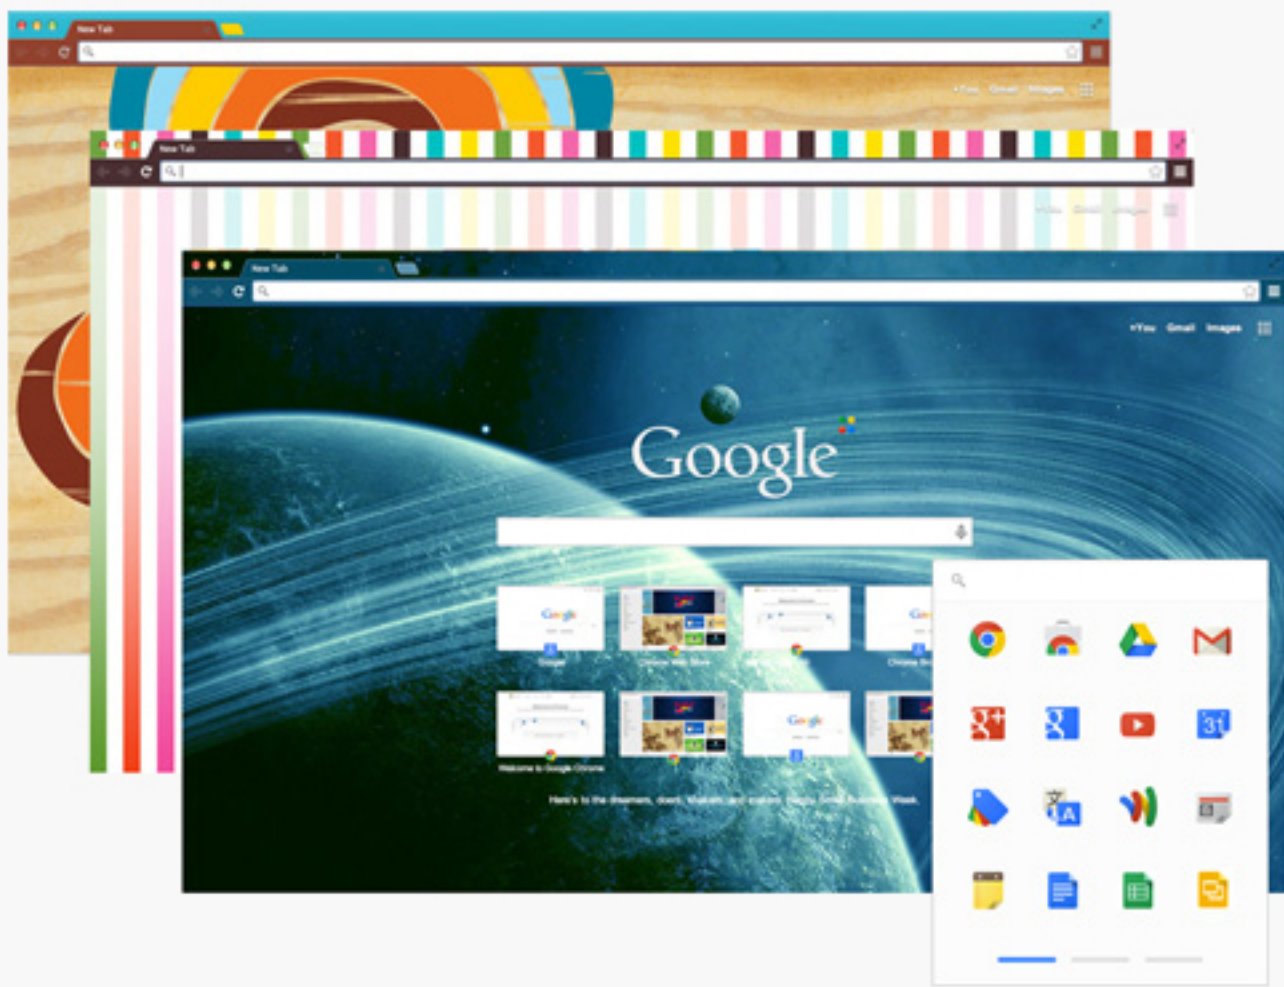

Continue at the stop

If you switch to a mobile phone while using your laptop, you do not have to search again for the web page you were reading. With Chrome, you can instantly access open tabs, bookmarks, and recent search results from any device. In this way, you can see the web you've opened from any device. [Learn more](#)

Create your own Chrome

Use the Chrome themes, apps, and extensions to use the internet the way you want. Bookmarks let you go directly to your favorite website and open the page. Once you've set up Chrome, your custom settings will sync to all of your devices. [Begin customization](#)
